

The NICE1 uses advanced technology to greatly improve the convenience and efficacy of cold + compression therapy without ice.

NICE1 delivers precise cold therapy without ice. It also provides programmable pneumatic compression which is proven to reduce edema and speed recovery. NICE1 integrates these highly effective therapies in a small (8 x 8 x 8 inches) and lightweight (9 lbs.) package with an easy-to-use touch screen interface.

COMEBACK STORY

“Not having to refill the machine with ice is incredibly convenient, especially when you’re recovering from surgery.”

LAURENNE ROSS

Olympic Skier

The NICE1
Cold + Compression
Therapy System

ENGINEERED FOR THE COMEBACK

NO ICE

NICE1 is an iceless system. This is a clear point of differentiation when compared with other cold therapy devices.

SMALLER & LIGHTER

NICE1 is the smallest and lightest cold + compression therapy device on the market.

SIMPLICITY

NICE1 has an extremely intuitive graphical touch screen interface that makes it easy to operate.

DESIGN-FORWARD

NICE1 is focused on a superior user experience, blending pro-tested design with state-of-the-art technology.

NICE1 is a breakthrough product in the sports medicine market, a market that increasingly relies on both technology and design to move the needle.

We've worked with top surgeons, engineers and industrial designers to create a superior product.

COOLING

State-of-the-art technology delivers therapeutic cooling without ice. The most convenient way to apply cold therapy.

COMPRESSION

Programmable intermittent and constant compression greatly improves the effectiveness of cold therapy and promotes healing.

RECOVERY

By combining the therapeutic benefits of cooling and compression in a single easy-to-use device, recovery times are greatly improved.
